# ABDUL BASIT IQBAL

Full-Stack Software Engineer (MERN)
Lahore, Pakistan | +92 331 9868432 | iamabdulbasit5@gmail.com | linkedin.com/in/abdul-basit-iqbal | github.com/Abw-0l0 | abw-0l0.vercel.app

## SUMMARY

Full-stack engineer with 4+ years of production experience across MongoDB, Express, React, and Node.js, plus Next.js and Laravel. I currently own a Node.js order-tracking microservice for an Amazon-to-eBay dropshipping platform, and before that shipped two live healthcare products as a Senior Software Engineer, deploying through AWS, Docker, Kubernetes, and Jenkins while working in JIRA under Scrum.

## SKILLS

**MERN & Languages:** MongoDB, Express.js, React (18/19), Node.js, JavaScript, TypeScript, SQL, PHP, Python
**Front-End & Back-End:** Next.js, Redux Toolkit, Tailwind CSS, shadcn/ui, REST APIs, microservices, webhooks, Laravel 11, Supabase, Firebase
**Databases:** MongoDB, PostgreSQL, MySQL, Redis, Firestore, Prisma
**Cloud, CI/CD & Workflow:** AWS (EC2, S3, Lambda, CodePipeline, CodeBuild, CodeDeploy), Jenkins, GitHub Actions, Docker, Kubernetes, JIRA, Agile/Scrum
**Testing:** Jest, Vitest, Playwright, nock, Postman, TDD

## EXPERIENCE

**Software Engineer** | SyncerraDS, Lahore | Sep 2026 – Present

- Own the Node.js and Express order-tracking microservice on a 4-developer team, syncing marketplace orders, tracking assignments, and Amazon tracking uploads with a third-party tracking API.
- Prevented duplicate and conflicting shipments through idempotent tracking assignment and 409 conflict handling, with a Redis-backed outcome store that survives restarts.
- Covered external calls with Jest and nock tests and containerized the service with Docker and GitHub Actions CI.
- Lead the seller dashboard and landing page rebuild in React 19, TypeScript, and Redux Toolkit, including a 4-step onboarding flow from signup to eBay store connection.

**Senior Software Engineer** | JSYS Technologies, Lahore | Nov 2024 – Jul 2026

- Authored about 400 commits (48% of the codebase, top contributor) on Rehasaku, a live Laravel 11 clinic booking platform for a Japanese client, including search, a 5-step facility registration, and the reservation flow.
- Co-built Neo Pedix, a live doctors' platform with patient management, appointment tools, and a dashboard showing AI voice-agent suggestions.
- Converted the platform's scheduling calendar into SteadyCalendar, an open-source npm package, with company approval.
- Replaced a manual template-redesign process with a self-serve AI web builder driven by client annotations.
- Shipped through AWS (EC2, S3, Lambda), Docker, Kubernetes, and Jenkins/GitHub Actions pipelines, tracking sprints in JIRA with Product, QA, and DevOps.
- Mentored junior developers, reviewed code for quality and security, and wrote Playwright end-to-end suites for booking flows.

**Freelance Full-Stack Developer** | Remote | 2023 – Present

- Built Turbo Bites, a multi-tenant offline-first POS in daily use by a Peshawar fast-food brand, with real-time sync, staff roles, and server-enforced payment rules.
- Cut the ordering site's location-gate load time from about 10 seconds to about 1 second.
- Wrote about 50% of the commits on E-Scaff, a MERN platform for a UK scaffolding company with quotations, PDF generation, and Stripe payments.

**Full-Stack Developer** | Orbailix, Peshawar | Apr 2022 – Nov 2023

- Developed content management systems and websites for local non-profits in PHP and SQL, from requirements through delivery.

## PROJECTS

- Created VoicemailZero, an AI phone-answering SaaS (Next.js, Supabase, Stripe, Retell AI) with 34 Vitest test files in GitHub Actions.
- Migrated mystory from Angular to Next.js 16 behind a Playwright parity suite; MongoDB, socket.io, Docker, and 42 test files.

## EDUCATION & TRAINING

**BS Computer Science** | IMSciences, Peshawar | 2020 – 2024
**NextWork DevOps Roadmap** | 13 of 14 projects: AWS CI/CD pipeline, Kubernetes, RAG API; Terraform in progress
**Languages:** English (professional), Urdu (fluent), Pashto (native)
